SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of an existing data collection.

The objective of the survey is to collect information on both trip expenditures and annual durable good expenditures made by marine recreational anglers. The survey will be conducted in two parts. One part will ask anglers about the expenses incurred on their most recent marine recreational fishing trip. The other part of the survey will ask anglers about their purchases of durable goods such as fishing gear, boats, vehicles, and second homes. As specified in the Magnuson-Stevenson Fishery Conservation and Management Act of 1996 (and reauthorized in 2007), NMFS is required to enumerate the economic impacts of the policies it implements on fishing participants and coastal communities. The expenditure data collected in this survey will be used to estimate the economic contributions and impacts of marine recreational fishing to each coastal state and nationwide. Slight revisions will be made to the existing trip expenditure questions to clarify certain types of expenditures, and two questions on the trip expenditure instrument will be dropped.

II. Method of Collection

The survey will be conducted using a combination of four modes: phone, in-person interviews, mail, and electronic (Internet and/or mobile app).
